W17EX-001

E 003

The W17EX-001 is a 6,5" cone driver developed for use as a high fidelity Woofer or Woofer/Midrange unit. Choose it when you want smooth extended frequency response, linearized driving force, and significantly lower distortion.

SPECIAL FEATURES:

Natural rubber surround and a new fiberglass cone, incorporating the latest cone technology to stiffen the cone and improve damping capability.

Perfectly matched moving parts for a smooth, extended frequency response.

Large magnet system for improved sensitivity and transient response.

Heavy copper rings mounted above and below the T-shaped pole piece, to reduce non linear and modulation distortion and increase overload margin.

Copper plating of the top and bottom plates and a solid copper phase plug, which enhance the performance of the copper rings and improve heat conduction away from the pole piece.

Gold plated terminals mounted on a stiff bakelite plate to reduce contact resistance and improve reliability.

Stiff and stable injection moulded metal basket to keep the critical components in perfect alignment.
